Spring Plant Sale / Fall Exchange

PLANT PREPARATION GUIDELINES

How to participate: Simply pot up any extra perennial divisions, plants, seedlings or cuttings, in a correctly sized pot. Your donations will look their best if potted a week or two ahead of the event to give them a bit of time to recover. TIP: Keep them well watered and stored in a shady spot.

Spring sale: We accept healthy annuals or perennials / fruit or vegetable seedlings.

Member fall plant exchange: Perennials, cuttings, seeds, bulbs, garden magazines.

Please remember to **LABEL** your treasures so buyers can choose wisely. Blank label sheets will be handed out at the Chalet meetings before the events. Details needed: plant name, flower colour, height, light & moisture requirements. Right plant in the right place = success! Experienced club members will be on hand to help you at the sale. Don't be shy to ask!

What to avoid: sad looking, droopy plants in unsuitable containers. Please donate only the sort of plants you would buy. They should be a credit to both you as a gardener and us as a horticultural club.

NEW POLICY: In keeping with best practices for responsible gardening to protect our native biodiversity, we will no longer accept these 7 invasive species at our live plant events: Vinca (Periwinkle), Goutweed, English Ivy, Yellow Flag Iris, Lily of the Valley, Invasive Honeysuckles, & Ditch Lily. **Government of Canada recommendations & adopted by Garden Ontario**

Best of all . . .
Now that you've made space in your garden by generously donating your extra plants, you can buy MORE plants! How can you resist these great deals? You can't. Remember all those empty spots that are begging to be filled ;)

** Remember **

Our Spring Plant Sale is our *only* fundraiser. The proceeds from it, along with membership fees, help fill our coffers so we can hire those great guest speakers, have bus tours, and offer workshops!
